

Independent complete-bulk validation of the SLAMF8–HSC axis

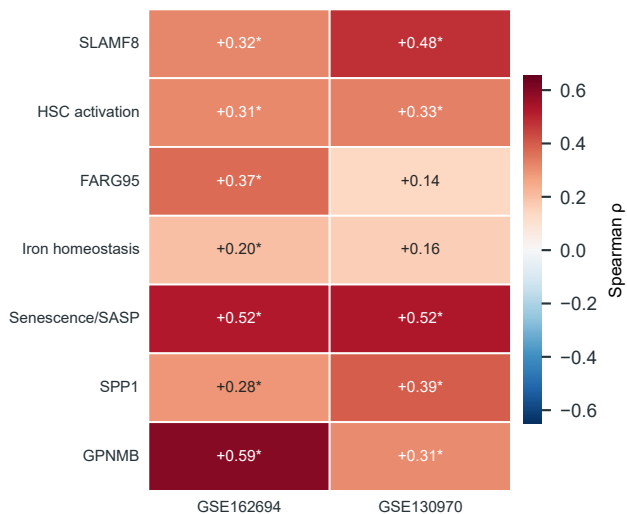

A GSE162694 | NAFLD biopsies, n=112
 $\rho=0.319$ · BH-FDR=0.0013 · F₂₂ AUC=0.692

B GSE130970 | NAFLD biopsies, n=78
 $\rho=0.476$ · BH-FDR=5.8e-05 · F₂₂ AUC=0.742

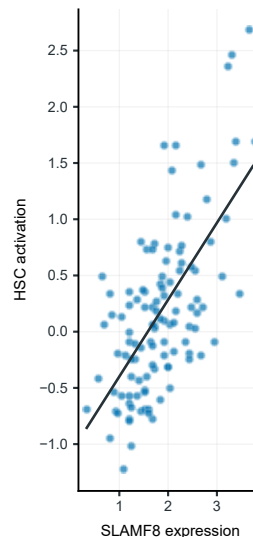

C Within-NAFLD fibrosis associations

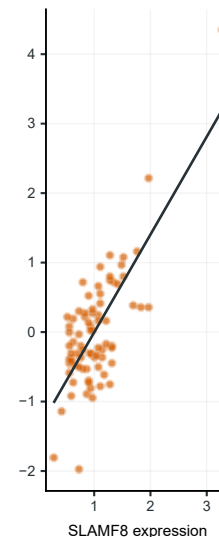

D GSE162694

$\rho=0.591$ · BH-FDR=8.5e-12

GSE130970

$\rho=0.528$ · BH-FDR=1.1e-06

* BH-FDR < 0.05 within cohort; modules are not uniformly replicated.

Expression units are cohort-specific (CPM+1 versus TPM+1). F₂₂ AUC is descriptive and untrained, not a clinical model.

Bulk-tissue association; cell-cell causality is not inferred.
