

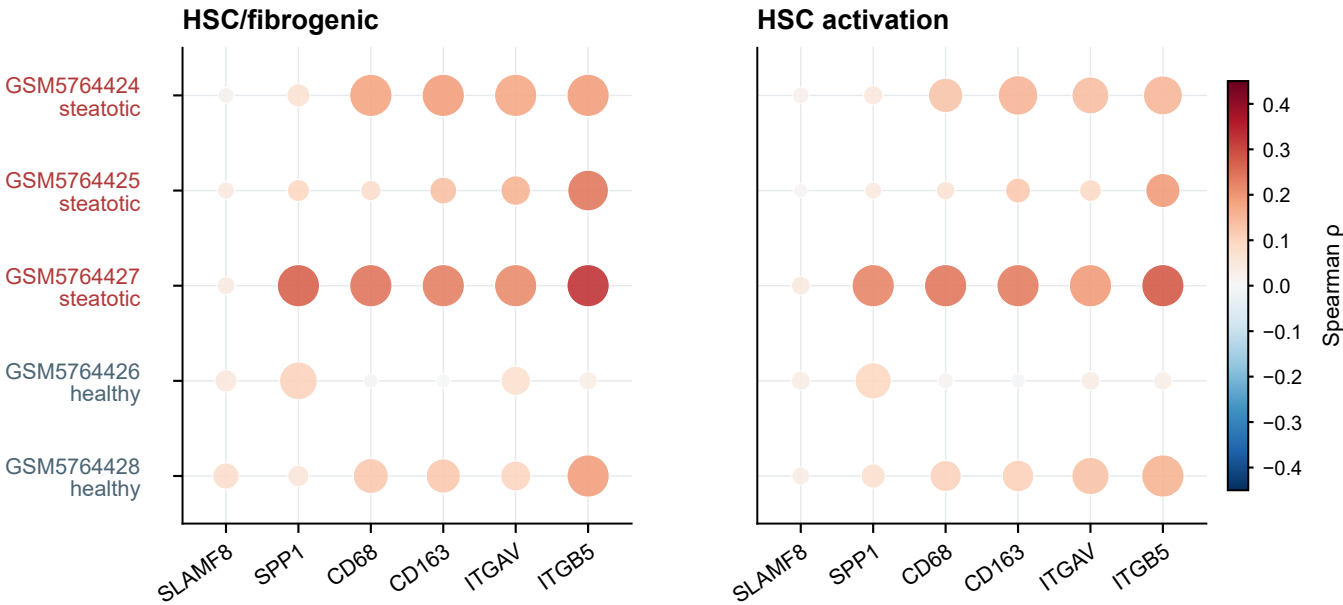

Figure S12 Independent GSE192741 Visium spot-level co-expression audit

C Sample-level audit scope and prespecified SPP1 correlations

Sample	Condition	Spots	SPP1–fibrogenic	SPP1–activation	SLAMF8 vs HSC
GSM5764424	steatotic	1,248	0.066	0.043	no stable association
GSM5764425	steatotic	532	0.092	0.041	no stable association
GSM5764427	steatotic	1,185	0.262	0.217	no stable association
GSM5764426	healthy	2,501	0.099	0.094	no stable association
GSM5764428	healthy	1,423	0.052	0.067	no stable association

Dots show spot-level co-expression; dot size is proportional to $-\log_{10}(P)$. Spots are mixed measurements and are not patient-level replicates.
